VMS New Electronic Signs

Travel times are displayed on the electronic sign unless a Traveler Information message is required. Travel time signs display estimated travel times to key destinations, so that drivers can plan their arrival time or consider taking an alternate route.

Traveler information signs alert drivers about crashes, congestion, road conditions, closures and other traffic-related information, giving drivers the ability to make travel decisions in real time.

SS New Advisory Speed Signs

Advisory speed signs display advisory speed based on the traffic ahead. The advisory speeds will change as real-time conditions change.
